Scrum, XP, Kanban.

PROFESSIONAL EXPERIENCE

July 2024
- September
2024

Internship

ADM Project Casablanca

- Designed and developed a web application dedicated to managing highway infrastructure projects.
- Implemented a multi-user platform enabling stakeholders to track, collaborate, and contribute to project progress.
- Developed a tracking module providing detailed visibility on project progress to facilitate decision-making.
- Deployed the application on Microsoft Azure Cloud for scalability and availability.

technologies used: React / SpringBoot

February 2024
- June 2024

Year-end Project Internship

UMPO

- Developed an absence management application integrating QR code and facial recognition technologies.
- Created an intuitive and user-friendly interface tailored to the needs of administrators, teachers, and students.
- Implemented an automated system for recording and managing absences across all school fields and levels.
- Designed a microservices architecture for better modularity, scalability, and independent deployment of services.

technologies used: React / Material UI / SpringBoot / Python / Flask
